

## HOW TO MAKE URBAN BANDAGES

Materials needed:

- Printed model.
- 3 red EVA sheets & 1 pink EVA sheet.
- Super Bonder glue & Ballpen & Cutter & Big Scissors & Ruler

**First step:** Place Piece 1 mold on the red EVA sheet and draw its format.

**Second step:** Cut out the EVA sheet following the previously drawn line.

**Third step:** Place Piece 2 mold on the pink EVA sheet and draw its format.

**Fourth step:** Cut out the EVA sheet following the previously drawn line.

**Fifth step:** Use a ballpen (preferably without ink) to make the little holes on the small part, using the mold as a basis.

**Sixth step:** Stick Piece 2 on Piece 1.

### Important instructions:

- Stick by the hole. The bandage / band-aid should be glued by the hole (not above it). The hole has to be visible so that no one can get hurt.
- Spread the bandage / band-aid. Take pics and forward them so that people can upload them on their website!
- Monitor your bandage / band-aid. List the streets where you have stuck the bandages / band-aids and visit the places in the following days. If the bandages / band-aids came unstuck, remove them and take them with you to avoid littering.
